Consumer / Merchant Savings Report 2013

Division of Standards Impact Saving Report For 2013

| Type of Device | Saving to Consumer | Saving to Merchant |
|-------------------------|--------------------|--------------------|
| Gasoline Meters | \$ 298,347 | \$ 2,590,835 |
| Vehicle Tank (Oil) | \$ 13,853 | \$ 54,983 |
| Vehicle Tank (Propane) | \$ 19,825 | \$ 62,123 |
| Total State | \$ 332,025 | \$ 2,707,941 |
| Total Municipal 2013 | \$ 9,625,192 | \$ 7,893,735 |
| Total State + Municipal | \$ 9,957,217 | \$ 10,601,676 |

DEPARTMENT OF CONSUMER AFFAIRS AND BUSINESS REGULATION

DIVISION OF STANDARDS

2014 ANNUAL REPORT (FOR WORK COMPLETED IN 2013)

\$21 Million in Consumer and Merchant Savings

A Message from the Division:

The primary mission of the Division of Standards is to provide uniformity in the marketplace by enforcing standard accuracy requirements for commercial devices used in the weighing or measuring of any item sold by weight, measure or count.

The Division of Standards is proud to issue its 2014 annual report for work completed in calendar year 2013. According to annual reports filed by local jurisdictions and through the committed efforts of the Division and its local weights and measures partners, Massachusetts individual and corporate consumers saved **\$21 million** dollars in 2013.

Every day, state and local weights and measures officials ensure that in every city and town in the Commonwealth, the devices that weigh our food products, measure our fuel, and scan our purchases are properly calibrated ensuring accuracy in these transactions. Uniformity in the marketplace underlies each of the more than **125,000** inspections that occur annually. The nearly **94,000** commercial weighing and measuring devices throughout the Commonwealth must be tested against a uniform set of standard weights and measures under the direction of and within the purview of the Division. Field standards utilized by weights and measures officials in certifying commercial devices must meet the exact same accuracy standards when compared with the state standards. All field test standards are required to be compared with and certified by the State Metrology lab where they are issued certificates indicating traceability to national standards. The process ensures uniformity not only throughout Massachusetts but throughout the country. Uniform standard test requirements ensure constancy which allows businesses to compete on a fair and equal basis. As a result, consumers are assured of receiving full value in their purchases. The Division is committed to training and certifying all weights and measures officials in our cities and towns to ensure that Massachusetts consumers receive full measure and fair value for the cost of their purchases.

During this past year due to the constant fluctuations both high and low in motor fuel prices the Division placed special emphasis monitoring motor fuel and fuel oil transactions across the state. The Division continues to survey the marketplace and inspect devices to ensure that the devices used in these transactions have been tested as required and that security seals affixed by weights and measures officials have not be tampered with potentially compromising device accuracy.

In addition, Division's compliance officers have been inspecting required signage, testing posted octane values and issuing civil citations for any violations.

The Department of Consumer Affairs and Business Regulation's Division of Standards is the best kept secret in state government. Through the work its compliance officers perform daily, Massachusetts' consumers are assured that the goods offered in the marketplace meet a uniform set of standards and that we all receive fair value on our purchases. The 2014 annual report documents that value.

Agency Profile:

The Division is responsible for enforcing the accuracy requirements and other standards relating to weighing and measuring devices and the use thereof in the sale of food, fuels and other products. DOS regulates the sale of gasoline and sets standards for lubricating oils and antifreeze, including the inspection of all fuel dispensing equipment for required markings pertaining to grade and brand. The Division also tests and approves coin operated devices, licenses auctioneers, transient vendors, peddlers, motor fuel and oil retailers and registers auto damage repair shops. In addition the Division enforces the item pricing law and the unit pricing regulations and oversees grants for enforcing item pricing requirements and scanner accuracy in retail stores.

In addition to our statutory requirements to annually test and certify all weighing and measuring devices used commercially in towns with a population less than 5,000, the Division tests and inspects price scanners in retail stores for accuracy. Price verification, item pricing inspections and training of local officials are our ongoing annual priorities. The Division has conducted training for local weights and measures agencies for the purpose of enforcing scanner and item pricing accuracy in retail stores. The division will continue to conduct training as new officials assume their duties.

The Division is required to administer the annual testing and certifying of all commercial weighing and measuring devices. Devices tested included:

- Small and large capacity scales
- Weights
- Motor fuel dispensers
- Vehicle tank meters used in the sale of liquid fuels
- Propane meters
- Milk tanks
- Coin operated amusement devices
- Reverse vending machines used for recycling soft drink containers
- Price scanning systems
- Law Enforcement Axle Load Scales
- Issues Waivers from Item Pricing

The Division also inspects pre-packaged food and non-food products to ensure that the net quantity is accurate and that minor variations are within acceptable legal metrology parameters.

The Division issued more than **12,000** licenses to auctioneers, hawkers and peddlers, transient vendors, promoters, motor fuel & oil dealers, auto damage repair shops and consumer scanner waivers.

2013 Accomplishments:

- Issued **12,212** licenses that produced **\$1.6** million in license fees.
- Tested and certified, as required, **13,428** commercial weighing and measuring devices in **108** towns under 5,000 in population and an additional **66** towns now under contract.
- Conducted over **21,000** inspections, which included scales, motor fuel dispensers including price signs, fuel oil deliveries, and pre-packaged commodities.
- Conducted **600** store inspections pertaining to item pricing and price verification, which resulted in **\$85,850** in civil penalties for various pricing violations.
- Issued **42** civil citations for various weights and measures violations amounting to **\$ 8757** in penalties.
- Administered certification tests and field certified **5** newly appointed local officials bringing the total of current certified local officials to **132**.
- Conducted training which resulted in **438** man-days for local officials in attendance for various weights and measures disciplines.
- Now contracted with **66** municipalities to provide weights and measures services.
- Conducted three marketplace surveys. 1. Annual Holiday retail pricing accuracy survey. 2. Statewide Motor Fuel Octane Survey. 3. Monitored fuel oil deliveries during the past heating season..
